

JAGADESH S

Full Stack Developer | Python · Django · REST API · PostgreSQL

Email: jagadesh2623@gmail.com | Phone: +91 79046 57654 | Location: Chennai, India | LinkedIn: linkedin.com/in/jagadesh-s-030006218/

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 1+ year of hands-on experience building secure, scalable web applications using Python, Django, and Django REST Framework. Adept at designing high-performance REST APIs with JWT Authentication and Role-Based Access Control (RBAC), delivering real-time WebSocket features, and streamlining workflows through Celery-based task automation. Proficient in MySQL and PostgreSQL query optimization, cloud storage integration, and Python-based system utility development. Backed by foundational expertise in PySpark and Hadoop for large-scale data processing pipelines.

TECHNICAL SKILLS

Languages	Python, JavaScript (ES6+), C#, HTML5, CSS3
Frameworks	Django, Django REST Framework (DRF), Flask, PySpark
Databases	PostgreSQL, MySQL — advanced query optimization, backup & restore
DevOps / Tools	Git, GitHub, Docker, CapRover, VS Code, Linux
Core Skills	REST APIs, JWT Authentication, RBAC, WebSockets, Celery, Celery Beat, Payment Gateway APIs, Cloud Storage APIs, Python EXE Development
Data Eng.	Linux, PySpark, Hadoop (foundational)

PROFESSIONAL EXPERIENCE

Backend Developer | Emayam Technologies Pvt Ltd, Chennai Mar 2025 – Present

- Engineered 12-Module production-grade REST APIs using Python, Django REST Framework, JWT Authentication, and RBAC, securing enterprise dashboards serving 500+ concurrent users and reducing unauthorized access incidents to Zero.
- Accelerated API response time by 40% by rewriting and indexing complex MySQL and PostgreSQL queries, cutting average data retrieval latency from 650ms to 390ms across high-volume enterprise datasets exceeding 1M records.
- Spearheaded a real-time WebSocket-powered chat module and configured Celery with Celery Beat for asynchronous task processing, reducing background job failure rate by 90% and automating scheduled workflows.
- Integrated cloud-based storage APIs (Nextcloud / Google Cloud Storage) for secure file upload and retrieval, streamlining document workflows across 8 application modules and cutting manual file-handling time by 75%.
- Architected reusable backend module patterns and Python-based monitoring utilities with REST API hooks and load-balancing logic, eliminating 35% of code duplication and accelerating feature delivery velocity by 20% across 2 active product lines.

KEY PROJECTS

Employee Monitoring System | Python · Django · DRF · WebSocket · Celery · Nextcloud

- Designed a full-stack employee productivity platform exposing REST APIs that process 50,000+ high-volume activity events daily — screenshot capture, screen recording, application usage tracking, and performance scoring.
- Engineered WebSocket-based real-time chat and a Python EXE monitoring agent; merged Nextcloud APIs for secure cloud file storage and attachment retrieval across user dashboards.
- Streamlined asynchronous workflows using Celery Beat, enabling hands-free scheduled reporting, API polling, and background data processing with zero manual intervention.

Real Estate Property Management System | Python · Django · DRF · MySQL / PostgreSQL · Nextcloud

- Constructed a multi-role property management portal (Buyer, Seller, Customer, Super Admin) with optimized REST APIs powering property listings, advanced search, and admin panel operations.
- Incorporated cloud storage for image and video assets with secure retrieval pipelines; applied automated database backup and restore routines to guarantee data integrity.
- Refined backend architecture and SQL query performance, cutting database read times for large-scale property listing datasets by 35% and ensuring consistent response under load.

EDUCATION

MCA – Computer Applications | D.G. Vaishnav College, Chennai | CGPA: 7.22 | 2022 – 2024

BCA – Computer Applications | Patrician College of Arts & Science, Chennai | CGPA: 7.22 | 2019 – 2022
